AIRMAN®

MOBILE AIR COMPRESSORS

Built to Perform in Any Environment

Run with the best. Run with AIRMAN.

ANACORP.COM

// World Class Support You Can Count On

ANA not only manufactures and sells the industry's highest-quality equipment, we back it with full-service support for AIRMAN® and Hokuetsu OEM products. Our expert service team is available 24/7 to keep your fleet running strong, offering on-call technical assistance, fast parts processing, warranty support, and hands-on product training.

ANA's digital Knowledge Base provides access to a comprehensive library of AIRMAN® technical documents, along with SmartEquip®, the leading platform for fleet parts and service information.

SmartEquip®

// Optional Accessories

ANA stocks a wide variety of genuine AIRMAN® compressor parts and model-specific accessories.

- Battery Wrap / Blanket
- Engine Block Heater
- CCV Heater
- Heated Fuel Filter
- Heater Regulator
- Telematics
- Quick Fit Oil EVAC - RPM
- Lower Radiator Hose Heater
- Single 50' - 3/4" Hose Reel*
- Single 100' - 3/4" Hose Reel*
- Dual 50' - 3/4" Hose Reel*
- Dual 50' - 1" Hose Reel*

*Hoses not included

// Why Choose ANA?

For over 80 years, AIRMAN® has set the standard in durable, high-performance mobile air compressors. With CFM options from 100 to 750 and pressure ratings of 100, 150, and 200 PSI, AIRMAN® offers single and dual-pressure models, including the industry workhorse, PDS185S. Built around AIRMAN's bulletproof air end and direct-drive technology, these compressors deliver maximum air volume, best-in-class power transfer, and ultra-quiet operation (62-76 dBA at 23'). Select models run up to 10 hours for full-day productivity and offer optional built-in aftercoolers.

// Productivity

- Superior efficiency air end reduces air supply lag time
- Easily accessed curbside filter servicing
- Remote fluid drains for painless fluid maintenance
- Jack stand with wheel makes for easy jobsite transport

// Serviceability

- Large access doors provide ample space for servicing
- Intuitive diagnostics aid in troubleshooting
- More than 95% of service issues resolved by phone
- 93% same-day parts fulfillment from ANA

// Cost of Ownership

- Extreme air end and engine control efficiency provide up to 20% in fuel savings
- Extremely long lasting machines that won't quit

// Return on Investment

- Rolled corners prevent damage and prevent corrosion
- Stainless steel hardware
- Air end efficiency reduces wear on engine
- Heavy duty construction improves resale value

Built to Perform in Any Environment.

AIRMAN® Value-Added Features

Large Gullwing Doors
Excludes PDS185L

Durable Electro-Deposition
Powder Coated Finish

Control Panel with Key
or Push-Button Start

QuietTech™ Sound Attenuation
and Automotive Door Seals
with Lockable Access Doors

Emergency Stop Button
On models PDS310 and up

Stainless Steel Hardware

Quick Access Air Connections

Easy Access Service Drains

Curbside Filter Servicing

Only ANA has the Industry's Highest-Quality Air Compressors

AIRMAN® Compressor Jobsite Performance

On the jobsite, downtime is expensive. Delays cut into profits, compliance adds risk, and crews need tools they can trust.

That's why AIRMAN® delivers reliable air power to keep projects moving and teams productive, no matter the industry.

Irrigation

Contractors use compressed air to protect sprinkler systems from freezing damage.

Concrete

Crews depend on consistent airflow to power tools and shotcrete applications.

Oil & Gas

Mobile air power for sandblasting and backup when on-site systems fail.

Telecom

Providers speed up fiber optic installation with dependable compressed air.

Across multiple industries, AIRMAN® helps crews get more done with less downtime, fewer interruptions, and peace of mind, knowing air power is always there when it's needed most.

Run with the best. Run with
AIRMAN®

// E2: Where Performance Meets Sustainability

AIRMAN's exclusive E2 airflow technology delivers unmatched efficiency and sustainable performance, standard on every AIRMAN® compressor. Engineered to optimize direct-drive power transfer, E2 minimizes energy loss with fewer moving parts, reducing wear while maximizing durability.

Ideal for industrial and construction sites, AIRMAN compressors feature ECO and AUTO ECO modes that intelligently adjust engine RPM based on load:

► ECO Mode:

Lowers idle speed below 1400 RPM during light-load operation, cutting fuel consumption and noise pollution.

► Auto Eco Mode

Briefly holds 1800 RPM, then drops to 1400 RPM during extended unloading, reducing fuel use during high-demand cycles.

E2 technology ensures precise, linear air regulation that matches airflow to engine speed for maximum fuel efficiency. Combined with built-in features like oil fences for 110% fluid containment (PDS185L model), AIRMAN® compressors deliver powerful output with a significantly reduced environmental footprint.
